

STRATEGIC PROPOSAL — COMPENSATION & RELOCATION

The Case for Dallas.

A data-driven proposal for relocating from Lubbock, TX to the DFW Metroplex — and adjusting my compensation to reflect the cost-of-living difference and the operational efficiency it creates for Hallow's Parish Partnerships program.

Submitted:	Current	Requested Adjustment:	Review Window:

	\$65,000		

2026 TRAVEL ACTIVITY — JANUARY THROUGH MARCH

The Numbers Don't Lie.

Since late January 2026, I've completed parish trips at a pace of nearly one per week — all departing from Lubbock Preston Smith International Airport (LBB), which has minimal direct routes and routes virtually all travelers through DFW first.

COMPLETE TRIP LOG — RAMP VERIFIED

Every Parish. Every Week.

All 9 completed trips in 2026 originated from Lubbock, TX. Every trip requiring a flight required an additional connecting leg through Dallas/Fort Worth — a cost and time burden that doesn't exist for colleagues based in hub cities.

TRIP 01 · JAN 23–27 Dayton Ohio Shadowing a parish mission ✈️ Via DFW Connection	TRIP 02 · JAN 31–FEB 2 Saint Paul Minnesota Four Pillars ACC — Parish Mission ✈️ Via DFW Connection	TRIP 03 · FEB 20–24 Grand Rapids Michigan Our Lady of Consolation — Parish Event ✈️ Via DFW Connection
TRIP 04 · FEB 27–MAR 2 Santa Fe New Mexico	TRIP 05 · MAR 3–5 Columbus Georgia Parish Event	TRIP 06 · MAR 6–8 Edmond Oklahoma St. John the Baptist — Growth Event

Santa Maria Parish — Parish Mission 🚗 Drive from Lubbock	✈️ Via DFW Connection	🚗 Drive from Lubbock
TRIP 07 · MAR 13–17 Lake Ozark Missouri Parish Event 🚗 Drive from Lubbock	TRIP 08 · MAR 20–24 Easton Maryland Ss. Peter & Paul — Growth Event ✈️ Via DFW Connection	TRIP 09 · MAR 27–31 Milton Massachusetts Parish Event ✈️ Via DFW Connection

The pace isn't slowing down. Two more trips are already scheduled in April — Albany, NY (Apr 10–14) and Otisville, NY (Apr 24–28) — with the B2B Quarterly in Boston set for June. At the current trajectory, 2026 is on pace for **40–50 parish trips**. Every flight-based trip still connects through DFW.

RAMP EXPENSE DATA — YTD 2026 (COMPLETED TRIPS ONLY)

What Travel Actually Costs.

The following expenses are pulled directly from Ramp and represent only completed trips in 2026. Future bookings are excluded. Data sourced from the Travel Card — Frequent Travelers fund and direct reimbursements.

Transportation		\$2,516
Lodging		\$1,325

Meals

\$52

YTD 2026 TOTAL

\$3,893

ANNUALIZED PROJECTION

~\$20,000+

At the current rate of approximately **\$390/week in travel spend**, the annualized projection exceeds \$20,000 — nearly a third of my current salary. This is the operational reality of running parish events from a low-connectivity city like Lubbock.

THE CORE ISSUE

Lubbock Is a Bottleneck.

Lubbock Preston Smith International Airport (LBB) has limited direct routes. Nearly every flight to an East Coast, Midwest, or non-Texas destination requires a connecting stop — almost always through Dallas/Fort Worth. This creates a compounding tax on every trip I take for Hallow.

Added Time on Every Trip

Each connecting flight through DFW adds 2–4 hours per trip —

An Avoidable Company Cost

The LBB→DFW connecting segment is an additional expense

time not spent with parish partners, preparing to lead events, or recovering between back-to-back weeks on the road.

- LBB→DFW flight + layover: ~1.5–2.5 hrs added each way
- 6 of 9 trips in 2026 required a DFW connection
- Est. 20+ hours lost to connecting travel YTD
- Limited flight windows = less flexible scheduling

on every flight-based trip — a cost that wouldn't exist if I were based at a major hub like DFW.

- Avg connecting round trip: \$175–\$300
- 6 connecting trips in 2026 YTD: ~\$1,050–\$1,800
- Annualized (30 flight trips/yr): ~\$5,000–\$9,000
- All of it disappears with a DFW address

THE SOLUTION

Why DFW Changes the Math.

Dallas/Fort Worth International Airport is one of the most connected airports in the world. For a role built around reaching parishes across the entire United States, it is the ideal base of operations — and arguably the most strategic home city I could be in for this job.

- ✓ Direct flights to virtually every major U.S. city — no more connecting hops
- ✓ American Airlines' primary hub — Hallow's carrier of record

DFW AIRPORT — AT A GLANCE

#4

Busiest airport in the U.S. by total operations

- ✓ Greater scheduling flexibility and more booking options
- ✓ Central time zone — optimal for team communication coast to coast
- ✓ Better rested and more prepared when I arrive at parish events
- ✓ Saves the company an estimated \$5,000–\$9,000/year in connecting flight costs
- ✓ Access to the DFW Catholic market — one of the largest in the country
- ✓ Easier to host or attend in-person team meetups

200+

Nonstop domestic destinations served

AA Hub

American Airlines' global headquarters & primary hub

COST OF LIVING ANALYSIS

What the Move Costs Me.

Lubbock is one of the most affordable cities in Texas. Dallas is substantially more expensive. For a 1-bedroom apartment or studio — the minimum to live and work effectively — the monthly gap is significant and the annual impact is material on a \$65,000 salary.

CURRENT — LUBBOCK, TX	
1BR Average Rent	~\$850 / mo
Annual Rent	~\$10,200

PROPOSED — DFW METROPLEX, TX	
1BR Average Rent	~\$1,450 / mo
Annual Rent	~\$17,400

Cost of Living Index	78 (well below avg)	Cost of Living Index	103 (national avg)
Airport Connectivity	Limited — LBB	Airport Connectivity	Best-in-class — DFW
Current Salary	\$65,000	Required Salary	\$75,000–\$85,000
Take-Home After Rent	~\$54,800	Take-Home After Rent	~\$59,600–\$69,600

The housing cost difference alone is **~\$7,200/year**. When broader cost-of-living differences are factored in (groceries, transportation, utilities), the total delta is closer to **\$9,000–\$12,000/year**. A salary adjustment in the \$10,000–\$20,000 range doesn't just make Dallas affordable — it makes it sustainable for someone doing this job at a high level, week after week.

THE BUSINESS CASE

This Investment Pays for Itself.

When the cost of eliminated connecting flights is accounted for, the net cost of a salary adjustment to the company is significantly lower than it appears on paper. In fact, depending on travel volume, a raise could result in minimal or zero net cost.

ESTIMATED ANNUAL CONNECTING FLIGHT COST (CURRENT)	NET ADDITIONAL COST TO COMPANY (AFTER SAVINGS)
\$5K–9K	\$1K–5K

Based on approximately 25–30 flight-based trips per year at an estimated \$175–\$300 per LBB→DFW round-trip connection. This expense is **fully eliminated** the moment I'm based at DFW.

A \$10,000 raise, offset by \$5,000–\$9,000 in eliminated connecting flights, results in a **net cost of \$1,000–\$5,000/year** — a fraction of the raise amount — for a significantly more operationally effective team member.

THE REQUEST

A salary adjustment of **\$10,000–\$20,000.**

My compensation review is scheduled for June 2026. I'm presenting this now to give leadership the time to consider it properly — not as an ultimatum, but as an honest conversation that I believe serves both me and Hallow. I'm deeply committed to this work and to the parishes we serve. I want to do it from a place that's sustainable, accessible, and set up for the long term.

\$75K

Minimum viable. Covers the core rent delta and makes the move feasible.

\$80K

Target. Reflects DFW cost of living, travel demands, and

\$85K

Full ask. Accounts for growth trajectory, increased responsibility, and full parity.
