Parishes of Kirkland maintained a steady baseline of 8–11 average daily users through most of 2025. November was the turning point — 220 new members joined in a single month, and the launch of *Be Still* on November 30 catalyzed a 7× surge, with December reaching 118 daily users and 13,905 prayers started. Lent carried the community to its highest-ever numbers: March 2026 hit 187 average daily users and nearly 19,100 prayers started.

Interesting Insights

— Witness to Hope set the gold standard for completion

Your community-specific challenge achieved an 83% completion rate — 34 of 41 participants finished every session. That's exceptional by any measure, and it illustrates a consistent pattern: when the content is built specifically for your parish, your parishioners show up and follow through.

— November was the turning point

220 new members joined Parishes of Kirkland in November 2025 — more than the entire prior seven months combined. That influx, paired with the launch of *Be Still*, transformed this community's engagement profile permanently. December's prayer volume was nearly 7× November's baseline.

— Lent brought your community to its highest-ever engagement

With 295 members joining *Lent Pray40: The Return* and daily active users reaching 187 in March, this Lenten season represents a new high-water mark for Parishes of Kirkland. Structured, seasonally-timed challenges are clearly the engine of sustained participation.

— Parishioners are self-directing — and choosing quality content

O Come, O Come, Emmanuel saw a 48% completion rate among participants who found it entirely on their own. *21 Days with Daniel* drew 54 organic participants, with 46% finishing. Your community is actively seeking out prayer content — and they're committed enough to finish it.

— Engagement is on a clear upward trajectory

Average daily users grew from under 10 in mid-2025 to 187 in March 2026 — an increase of nearly 20×. With Lent winding down, a community-specific spring or Easter season challenge could sustain this momentum into Ordinary Time.
